World-Class Material

DaFender

Super safty for the panels.

The opening between LGP and LED will be 0.5mm or 0.1mm although the PCB board is very thin. The LGP will be very safty. The opening between the LGP and LED. We will add the suspended lining for the hight grade LGP. The LED. The gap will completely avoid. LED being squeezed by LGP and the Panel expansion.

R-DIM

0-10V & PSV Dimming is an unique dimming technology

Advantage:

- Smooth dimming
- Wide dimming range

Applicable occasions:

- Hotel
- Office
- Shopping mall
- Hospital
- Other occasions

DALI

DALI dimming is digital dimming

Advantage:

- Digital dimming
- Wide dimming range
- Dimming precision
- Dimming curve

Applicable occasions:

- Hotel
- Office
- Shopping mall
- Hospital
- Other occasions
